

OBSIDIAN への移行支援ガイド

既存の資料を活用する

既存の多量の資料を、統一された形式に変更したい。

以下の項目について、一括処理 (追加・更新) する必要がある。

それぞれ役立つ情報を記載する。

Filename

- Uniq Filename (Core)
- GitHub - jaschaephraim/obsidian-title-generator
- GitHub - rcsaquino/obsidian-auto-filename: Auto Filename is an Obsidian.md plugin that automatically renames files in Obsidian based on the first x characters of the file, saving you time and effort.
- GitHub - snezhig/obsidian-front-matter-title: Plugin for Obsidian.md

Property (yaml frontmatter)

- GitHub - technohiker/obsidian-multi-properties: Plugin for Obsidian that allows user to add properties to multiple notes at once.

```
# Test output -- add private classification
find ./Spaces -name "*.md" -exec yq --front-matter="process" '.classification="private"' {} \;

# Actually write the files
find ./Spaces -name "*.md" -exec yq --front-matter="process" '.classification="private"' -i {} \;
```

Tags

```
@echo off
setlocal enabledelayedexpansion
set "folder=your file path here"
for /r "%folder%" %%f in (*.md) do (
    (echo ---& echo tags: unpolished& echo aliases:& echo cssclass:& echo ---& echo. & type "%%f") > "%~-dpnf.tmp"
    move /y "%~-dpnf.tmp" "%%f" > nul
)
```

Linting/SpellCheck

- GitHub - platers/obsidian-linter: An Obsidian plugin that formats and styles your notes with a focus on configurability and extensibility.

- Use custom script

Footnote

- Use custom script
- GitHub - MichaBrugger/obsidian-footnotes: Makes creating footnotes in Obsidian more fun!
- GitHub - technohiker/obsidian-multi-tag: Obsidian plugin that allows the user to add a tag to all files in a folder. Not in active development. Now working on Multi-Properties, which covers most of this plugin's functionality.
